

2009 Strong Kids Goal: \$97,000

As a single, working parent, the YMCA has given me the greatest gift—peace of mind. Through their summer program my daughter engages in healthy physical and creative activities. The instructors have been very positive mentors for my child, and she is learning leadership and self-confidence skills from them. Without the YMCA, I would not be able to place my daughter in a program of this caliber. The YMCA has been a blessing for both of us. Thank you!
- Paula, 2009 Day Camp Parent

Donations from last years campaign helped 2,673 individuals experience the positive effects of YMCA programs and activities. A total of \$206,781 worth of financial subsidies were provided.

Each year thousands of children participant in YMCA enrichment programs where quality care, character development, education, and fun are the focus.

With a progressive swimming program that incorporates skills and character development, the YMCA teaches thousands of children and adults about water safety and skills needed to swim with confidence throughout their lives.

Each day, YMCA seniors find companionship and wellness activities at the YMCA. Seniors are the fastest growing group today at the YMCA.

YMCA youth sports programs guarantee that kids have an opportunity to play. The YMCA sports philosophy is about making friends, learning and having fun, not scoring the most points.
